

Customer Guide to Measuring

**THE
VALLEY SHUTTER
CO.**

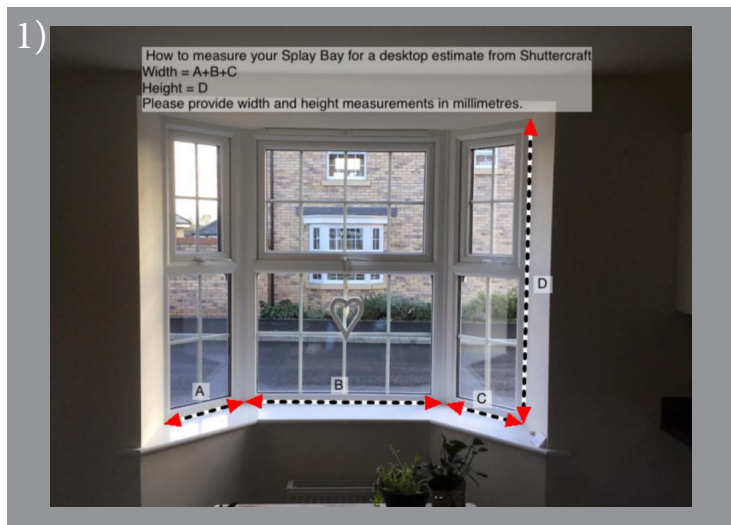

My Shutter Estimate

Welcome to your Step by Step guide "How to measure for my Shutter estimate"

You will need

- Pencil
- Paper
- Tape measure (metric – mm, cm and m)

Step 1 Find the image below that most closely matches your window:

Step 2 Once you have selected the closest match, go to the corresponding enlarged image below

Step 3 Measure each section in millimetres (mm) and write down the corresponding measurement next to a) and b), and c) d) e) f) where applicable.

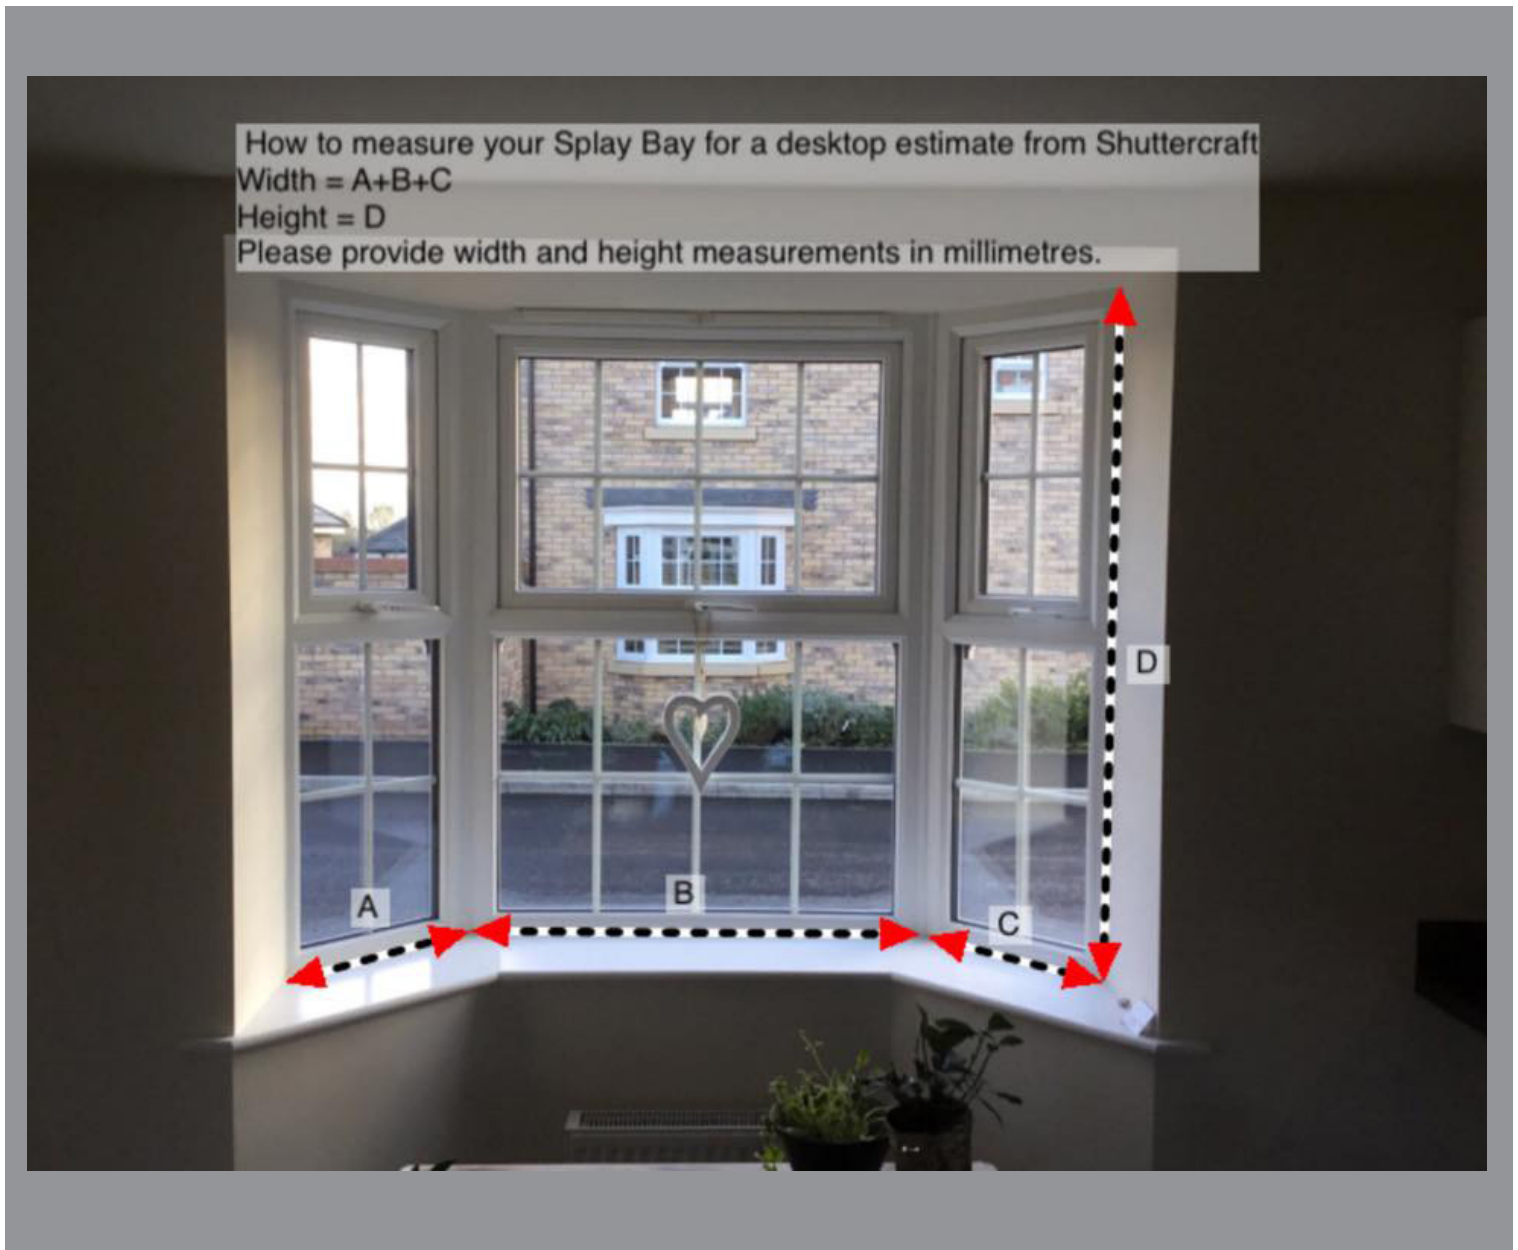

Step 4 Measure each section again – just to make sure – and confirm your numbers.

Step 5 Email/text or call your measurements through to us. Please ensure to also send us a photo of the window straight on - clearly labelled to correlate with measurements (particularly if there is more than one window).

Step 6 We will be in contact with your estimate as soon as possible.

Window 1

Measure each section in millimetres (mm) and write down the corresponding measurement next to a), b), c) and d) where applicable.

If you have any questions in the meantime please contact us or visit our website www.thevalleyshutterco.co.uk

Our website is full of helpful advice, our full range of shutter styles, colours and materials not to mention lots of inspirational imagery for you to browse through.

A Matter of Style

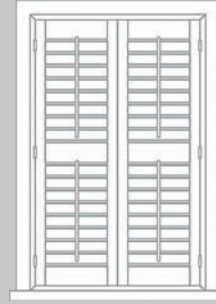

No matter the size or shape of your windows, there will be a shutter style to suit your room. Some styles will work better for certain types of windows. Your local shutter expert will be able to advise with confidence, helping you to choose the right shutter style for your window shape.

Bay Window

These shutters are fitted to the window, leaving more space in the bay itself.

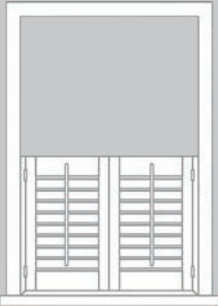

They look just as stunning from the road, providing great kerb appeal.

Full Height

The most popular style of window shutters. These cover the whole height of the opening, and can have a mid-rail added, providing greater light control.

Whether you prefer a classic or more contemporary style these may be a good choice for you.

Café

Covering only the bottom part of the window.

If you are looking to make the most of natural sunlight, but retain your privacy, then café style is the one for you.

Tier-on-Tier

They have a similar look to full height. The panels are split in two so that the sections can be operated independently.

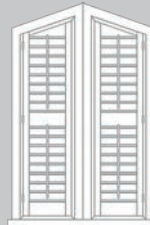

Perfect if you need partial access to your windows for easy opening.

Skylights and Conservatories

Conservatories are designed for enjoying the sun and your garden. Shutters provide privacy, while still letting the light in and providing shade when you need it.

Shutters are a stylish solution for skylights, which can be tricky to dress with other window coverings such as curtains.

Special Shapes

Each shutter being made-to-measure means they can fit nearly all tricky shapes and really enhance your windows fantastic feature shape.

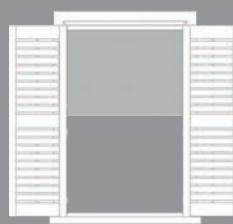

If you are struggling to find a window covering for an angled, curved, or shaped window, then shutters are the solution.

Solid Panel

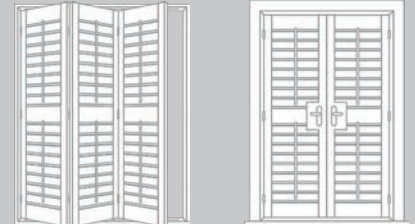

Most favoured in period properties, such as cottages and Victorian town-houses.

This style does not have louvres so needs to be opened fully to let in the light.

Shutter & Shade

Get the best of both worlds with a beautiful shutter with an integrated blind. The practical benefits make them perfect for bedrooms and nurseries, or if you work nights and have to rest in the day, they could be the solution for you.

Doors/Opening

As well as providing a great solution for windows, shutters are also fantastic for helping divide up your stylish open plan home. Or use them as wardrobe doors or a cover for French doors.

The Materials

We have a variety of shutter materials to suit every room from special waterproof ABS to robust MDF.

Seattle

MDF

Seattle is our entry level shutter solution made from a high quality MDF, covered in a patented polymer coating. It is robust and hard-wearing.

Boston

Hardwood & MDF

Boston is our entry level hardwood range. They are made from premium, robust MDF frames, but feature lightweight hardwood panels and louvres.

Georgia

MDF & ABS

Georgia is a hybrid of Hollywood, and Seattle, featuring robust MDF frames and panels with hollow lighter ABS louvres.

It comes in a wider colour palette and more closely resembles the finish of a painted hardwood shutter.

Hollywood

100% Waterproof ABS

Hollywood is 100% waterproof and very strong, made from sturdy ABS. Ideal for high humidity rooms such as bathrooms and kitchens, as well as children's play areas. ABS is the material from which motorcycle helmets are made.

Montanna

Premium Hardwood

When stained, the shutters are made from sustainable Paulownia, harvested every 7-10 years. It has a distinct grain, ideal if you love natural textures. Painted shutters are made from a mix of three premium hardwoods.

They are perfect for covering large window expanses and glass ceilings. They can also be crafted into any shape.
